

Environmental Policy

The Nucor Decatur facility is committed to the continual improvement of environmental performance through its Environmental Management System. Environmental protection is a primary management responsibility, as well as the individual responsibility of every team member. We endorse the “STEEL” principles.

Strive to reduce, reuse & recycle thru Pollution Prevention

We strive to reduce, or prevent, the environmental impact of our products in their design, manufacture, distribution, use, and disposal whenever possible.

Targets & objectives to drive Continual Improvement

This division defines and sets environmental objectives and targets. The process includes identifying developing and implementing plans to achieve these targets taking into account legal, significant environmental aspects, technological options, financial, cultural, strategic, operations and business requirements and the views of interested parties. This division is committed to a continual improvement process. In addition, management is committed to providing adequate personnel and other resources.

EEnvironmental compliance

This division is committed to meet legal and self-imposed responsibilities regarding environmental issues.

Enhance the business with an effective Environmental Management System

We are committed to implement and maintain our EMS to add value to our business by assisting to safely and profitably produce quality steel that meets or exceeds our customers' requirements.

Leaders in Environmental stewardship

We recognize potential for environmental impact upon our community. We will continually strive to minimize these impacts by evaluating our operations and researching new technologies and opportunities. We will communicate with interested parties.
